TerraClean Decarbonizing Machine - Part # 201160

Features and Benefits

- Decarbonizes the entire fuel system, including the O2 Sensor and the catalytic converter
- Restores fuel efficiency
- Maximizes vehicle performance
- Reduces harmful emissions

Why use the TerraClean Decarbonizer?

The TerraClean Fuel System Decarbonizer's revolutionary technology goes beyond that of "traditional decarbonizers" by removing carbon deposits from the entire fuel system, including catalytic converters and O2 Sensors. Where other systems use harsh additives, TerraClean decarbonizes the entire fuel system using technologically advanced chemistry that is safe for the technicians, the vehicle components and the environment. As well, unlike solvent or detergent based cleaners which can increase emissions during and after service, virtually no noxious emissions are emitted during a TerraClean service. Used in conjunction with the [Premium Tune Up Kit 201200](#).

Premium Tune Up Kit - Part # 201200
Premium Tune Up Kit - Part # 201400 for engine 2.0L and below

This is an ideal kit for those that want to offer a premium 2-part decarbonizing service. It combines the cleaning power of Fuel injector Cleaner and Fuel & Post Combustion Cleaner. When used with the TerraClean Decarbonizing Machine 201160, TerraClean Fuel System Cleaner clean injectors, intake valves and the continues the cleaning process, Chemically binding to and combusting carbon deposits, revitalizing the fuel system while also cleaning Oxygen sensors and the catalytic converter.

Features and Benefits

- Heavy duty formulation for cleaning excessive carbon build up
- Based on molecularly modified gasoline o no harsh chemicals are used to clean the fuel system
- Use with the TerraClean fuel system decarbonize for a fast and very effective fuel system service
- OEM approved.

Pressurized Induction Tool - Part # 201145

Features and Benefits

- Can be used to clean induction system through the air intake or through a vacuum line
- Tool comes complete with S-tool and vacuum line attachment
- Easy to read gauge for accurate pressure settings
- Sight glass allows the Technician to monitor chemical level no guessing when the service is complete
- Schrader valve on gauge assembly allows for simple, safe depressurization of the system when the service is complete

Product Description

Direct Injection Engines are particularly susceptible to carbon build up on the backs of the intake valves. These valves are not cleaned during a conventional fuel system service and require a separate cleaning through the induction system. As more and more vehicles are made with Direct Injection Engines, there is a greater need to service the Intake Valves separately from a conventional Fuel System Cleaning.

The TerraClean Pressurized Induction Tool helps you perform an effective induction service on Direct or Conventional Fuel Injected Engines. After filling the tool's cylinder with [TerraClean Intake Valve and Deposit Cleaner 201230](#), it is pressurized using shop air. The S-Tool is placed inside the intake past the Mass Air Flow Sensor and a fine spray of cleaner is introduced into the system. The intake valve deposit cleaner is sprayed on to the valves, ensuring that they are cleaned of hard carbon deposits that negatively impact effective combustion. Alternatively, using the Vacuum line attachment, the tool can be connected through a vacuum line, allowing for a faster introduction of the chemical into the air intake.

Super Strength Tune Up Kit - Part # 201200X

TerraClean Super Strength Tune Up kits are formulated to provide a highly effective and efficient fuel system service. TerraClean Super Strength Fuel Injector Cleaner Clean injectors, restoring proper spray patterns and decarbonizes intake valves and the combustion chamber to improve engine performance. TerraClean Fuel and Post Combustion Cleaner continues the cleaning process in the fuel system and downstream to the oxygen sensor and catalytic converter. This is an ideal kit for vehicles that have particularly heavy carbon build up.

Features and Benefits

- Heavy duty formulation for cleaning excessive carbon build up
- Bases on molecularly modified gasoline so no harsh chemicals are used to clean the fuel system
- Use with the TerraClean Fuel System Decarbonizes 201160 for a fast and very effective fuel system service.

Minor Decarb Kit - Part # 201202

This Kit combines the Fuel Injector Cleaner and Fuel & Post Combustion Cleaner with Concentrated Fuel Treatment. It is designed to deliver a complete decarbonization while eliminating the harmful effects of water and ethanol in the fuel, after using Fuel injector cleaner and Fuel & Post Combustion Cleaner to complete the carbonization, Concentrated Fuel Treatment is added to the fuel.

Features and Benefits

- For use with the TerraClean Fuel System Decarbonize 201160 for a fast and effective fuel system service
- Specially formulate for cleaning fuel injectors, intake valves, combustion chambers, oxygen sensors and catalytic converters
- Eliminates ethanol related issues in fuel
- OEM approved.

Major Decarb Kit - Part # 201212
Major Decarb Kit - Part # 201412 for engine 2.0L and below

This is an ideal kit for those that want to offer a premium 2-part decarbonizing service. It combines the cleaning power of Fuel injector Cleaner and Fuel & Post Combustion Cleaner. When used with the TerraClean Decarbonizing Machine 201160, TerraClean Fuel System Cleaner clean injectors, intake valves and the continues the cleaning process, Chemically binding to and combusting carbon deposits, revitalizing the fuel system while also cleaning Oxygen sensors and the catalytic converter.

Features and Benefits

- Heavy duty formulation for cleaning excessive carbon build up
- Based on molecularly modified gasoline no harsh chemicals are used to clean the fuel system
- Use with the TerraClean fuel system decarbonize for a fast and very effective fuel system service
- OEM approved.

GDI Intake Valve Cleaner- Part # 201232

Direct injection Engines can be susceptible to deposits on the backs and stems of the intake valves. TerraClean GDI Intake Valve Cleaner effectively cleans intake valves and restores engine performance. It is applied directly to the valve with the intake of the engine removed.

Features and Benefits

- Removes hard baked on carbon form the intake valves
- Improves fuel economy
- Restores lost power

Induction System Cleaner- Part # 201425

Carbon deposits can form on the back side of intake valves. This particularly true on newer Direct injection Engines. TerraClean Induction System Cleaner effectively cleans intake valves as well as the combustion chamber, piston crowns, piston ring lands and fuel injector tips.

Features and Benefits

- New organic based formula that improves spray performance and doesn't clog the S-Tool
- Improved all weather stability and reduced viscosity
- Removes carbon from the intake valves and combustion chamber
- Improves fuel economy
- Restores lost power

Fuel System Purge - Part # 201275

Fuel System Purge is a complete fuel system cleaning product designed to be thought the fuel rail using a pressurized canister fuel tool. Fuel System Purge uses proprietary chemistry to clean combustion chamber deposits, revitalize performance and restore fuel economy. It also inhibits fuel system corrosion and eliminates hesitation. It contain a concentrated detergent package that rapidly clean fuel system including injectors and intake valves.

Features and Benefits

- Eliminates hesitation and restores fuel economy
- Inhibits fuel an emission systems corrosion

Air Intake Cleaner (418g)- Part # 201286

TerraClean Air Intake Cleaner effectively cleans the intake system of a vehicle, including the throttle body, throttle valve and the idle air control valve. Its 360° spray nozzle allows the technician to spray upside down in tight spaces. TerraClean Air intake cleaner is safer for O2 Sensors and Catalytic converter.

Features and Benefits

- Effectively cleans the entire Air Intake System
- Catalytic Converter and O2 sensor Safe
- Packaged with an easy to use 360° Spray valve
